**Pre-Solicitation Notice for Perimeter Security Fence Extensions, United Kingdom**

The American Consulate General, Frankfurt, invites qualified steel/metal working companies to participate in a solicitation for the upgrading of the existing perimeter security fence at the U.S. Embassy London, United Kingdom. The purpose of this construction project is to increase the height of the existing perimeter fence and entry gates. The existing metal fence and gates (which were installed in 2008) shall remain in place and shall be extended in height by integrating additional post extensions and by mounting additional steel fence elements on top of the existing fences and gates. To the maximum extent possible, all new steel elements shall be pre-assembled before delivery to the site so that the on-site installation may be completed within not more than four (4) weeks. At this time, a total performance period of one-hundred calendar days is anticipated. The magnitude of the project is estimated to range between 250,000 and 500,000 U.S. Dollars.

The Government intends to make award to the company that has submitted the proposal with the lowest evaluated price, provided the offer is found technically acceptable, offers a fair and reasonable price, and the offeror is determined to be responsible.

Issuance of the solicitation package is planned to occur on or about March 12, 2010. A pre-proposal conference and site visit is planned to be held at 14:00 hrs local time on Thursday, March 25, 2010 at the American Embassy, 24 Grosvenor Square, London W1A 1AE, United Kingdom. The closing date for receipt of proposals is established as April 7, 2010.

If you wish to participate in this solicitation, please request a solicitation package via e-mail from RPSO, Werner Guss, e-mail: [gussw@state.gov](mailto:gussw@state.gov) by March 19, 2010, and please provide your company's full address, telephone number, fax number, e-mail address, and a point of contact.
